SUMMARY

Backend Engineer with 4+ years of commercial PHP experience (Laravel, Yii2), focused on payment integrations and business-critical backend logic. Has integrated international and region-specific payment providers and worked on high-traffic systems with multi-million-row databases. Owns work end to end, from database design to production deployment.

WORK EXPERIENCE

Backend Developer — Frozeneon

Dec 2025 - Oct 2026

- Contributed Laravel backend features to Hellcase, a high-traffic CS2 skin platform with roughly 2M monthly visits.
- Worked within a large legacy codebase and a multi-million-row MySQL schema as part of a 12-developer team.
- Delivered business logic and third-party service integrations within API-driven workflows.

Backend Developer — Logix Software

Jan 2025 - Nov 2025

- Delivered and maintained 20+ client projects for the US trucking and logistics sector, across Laravel and legacy PHP codebases.
- Implemented and repaired payment flows, including Authorize.net integrations, and resolved business-logic defects across both new and existing projects.
- Worked within a 25-developer team, including WordPress-based projects handled at the PHP level.

Backend Developer — Constant Technologies

Apr 2022 - Jan 2025

- Developed and maintained Yii2 applications for a worldwide SMB growth platform used by 100+ businesses.
- Integrated numerous international and region-specific payment providers, including gateways local to individual markets.
- Improved application performance through schema improvements and SQL query optimization, and delivered REST APIs with frontend developers.

Full Stack Developer (Part-time) — B2B Development

Oct 2022 - Jun 2023

- Built responsive frontend interfaces using HTML, CSS, Bootstrap, and jQuery.
- Implemented RESTful APIs for frontend-backend communication and integrated backend functionality into web interfaces.
- Ensured cross-browser compatibility and a consistent user experience across supported environments.

PROJECTS

Laravel URL Shortener

github.com/Hayrapetyan-AM/laravel-url-shortener

- Filament admin dashboard, per-link click statistics, and a PHPUnit test suite.

Laravel + Vue Blog

github.com/Hayrapetyan-AM/blog_laravel_vue_separate

- Laravel 11 with Vue 3 Composition API and Inertia; backend and frontend as separate applications.

Twofish Cipher

github.com/Hayrapetyan-AM/twofish

- Twofish block cipher implemented from scratch in PHP.

SKILLS

- **Backend:** PHP, Laravel, Yii2, REST API design, OOP, MVC, design patterns, service-layer architecture, legacy code refactoring
- **Payments:** Authorize.net, card and crypto payments, international and region-specific payment gateways
- **Databases:** MySQL, PostgreSQL, MariaDB, SQLite, query optimization, schema design
- **Frontend:** JavaScript, jQuery, Vue.js, HTML, CSS, Bootstrap, Tailwind CSS
- **Infrastructure & tools:** Linux, Apache, Docker, Redis, RabbitMQ, Git (GitHub, GitLab)
- **Domains:** iGaming / CS2 skin platforms, payments and fintech integrations, US logistics and trucking, SMB SaaS

EDUCATION

National Polytechnic University of Armenia

Bachelor's Degree in Information Security, 2019 - 2023

Ararat Regional State College

Information Technology, 2014 - 2018

LANGUAGES

- Armenian — Native
